

EBSG | NCDR-related EB Regulation Amendments

17 April 2024

Recent developments & Next steps

- Network Code Demand Response (NCDR) related EB Regulation amendments have been under development since December 2023. An analysis was conducted to identify the set of amendments necessary to ensure consistency between EB Regulation and the new NC DR. Those amendments refer to:
 1. **Minimum bid size of standard balancing products;**
 2. **Imbalance adjustment processes;**
 3. **Requirements in case balancing bids are used to ensure system balance in a context of redispatching;**
 4. **Full Activation Time definition;**
 5. **TSO-DSO interactions;**
 6. **Prequalification amendments in the EB Regulation.**
- The goal is for ENTSO-E to submit EB Regulation amendments for alignment with the NCDR simultaneously with the NCDR and NCDR-related SO Regulation amendments submission to ACER by 8 May 2024.
